

No. of Functional Features Included in the Solution

Date	15 March 2024
Team ID	
Project Name	Credit Card Approval prediction
Maximum Marks	5 Marks

Functional Features Overview:

This document presents the functional features implemented in the Credit Card Approval Prediction system. It describes each feature, its purpose, implementation status, and its contribution to the overall solution. The project uses machine learning techniques to analyze applicant information and predict whether a credit card application should be approved or rejected. The listed features ensure the system is accurate, user-friendly, secure, and efficient for both applicants and administrators.

S.No	Feature Name	Feature Description	Module / Component	Status (Done / In Progress / Pending)	Marks Contribution
1	User Registration & Login	Allows users and administrators to securely access the system.	Authentication	Done	High
2	Applicant Details Form	Collects applicant information such as income, employment, age, credit history, and loan details.	User Interface	Done	High
3	Credit Card Approval Prediction	Uses a Machine Learning model to predict whether a credit card application is approved or rejected.	ML Prediction Engine	Done	High
4	Data Preprocessing	Cleans and prepares applicant data before prediction.	Data Processing	Done	Medium
5	Prediction Result Display	Displays the approval/rejection result with prediction confidence.	Result Module	Done	Medium
6	Admin Dashboard	Enables administrators to monitor applications and manage records.	Admin Module	In Progress	Medium
7	Report Generation	Generates reports of prediction history and applicant details.	Reporting Module	Pending	Low
8	Error Handling & Input Validation	Validates user input and handles system errors gracefully.	Validation Module	Done	Medium

Feature Summary:

Metric	Count / Value
Total Features Planned	8
Total Features Implemented	6
Core / Must-Have Features	User Login, Applicant Form, Data Preprocessing, ML Prediction, Result Display, Input Validation
Additional / Nice-to-Have Features	Admin Dashboard, Report Generation
Features Tested & Verified	6

Feature Category Breakdown:

S.No	Category	Features in Category	Example Features
1	User Interface (UI)	Login, Registration, Applicant Form, Result Page	User Registration, Applicant Details Form
2	Backend / Logic	Data Processing, Prediction Logic, Validation	Credit Card Approval Prediction, Error Handling
3	Database / Storage	Applicant Information Storage	User and Application Records
4	API / Integration	Frontend–Backend Communication	Flask REST API for Prediction
5	Security / Authentication	User Authentication and Access Control	Login Authentication, Session Management
